

About GTG

GTG is the result of a unique collaboration between industry and municipality. The school is jointly owned by AB Volvo and Volvo Car Corporation, together with the City of Gothenburg.

On their learning center located at Volvo Torslanda and Lindholmen, both high school students and adults were educated, which is in line with the future of education and creates a safe and stimulating learning environment.

Objective

To develop an education concept and do the teaching.

Issues were Programming, CAD, Databases and MS Office.

High school teacher and concept development

Project

Develop education concept and do the teaching.
Issues; Programming, CAD, Databases, MS Office.

Vision

The vision was to give each student a platform to understand and learn how to develop and manage programs used in the industry.

The courses were developed together with the students according to the school principals.

The work

The education was scheduled and conducted in the school premises. All students had their own computer and training were conducted with both individual work and group work. I created tests and exams which also led to their final grade.
